

Brief Contents

Preface	vii
1 Introduction	1
2 Production System Types, Machine and Buffer Parameters, and Performance Metrics	25
3 Mathematical Modeling of Production Systems	51
4 Fundamentals of Production Systems Engineering	77
5 PSE Toolbox-assisted Design of Continuous Improvement Projects	129
6 PMA-enabled Design of Continuous Improvement Projects	159
7 Smart Transmission Case Machining Line	205
8 Smart Electronic Board Production System	227
9 Smart Ignition Control Module Assembly System	247
10 Smart Underbody Assembly System	269
Epilogue	287
Acknowledgements	289
References	291
Acronyms and Notations	295
Index	299
